

Dear FCC,

I am opposed to the preposal by SAVI Technology for increased RFID capabilities.

I believe it will be very harmful to the Amateur Radio Service in the 420 to 435 MHz band. There are far too many Part-15 devices making use of Amateur Radio frequencies above 30 MHz.

There will eventually be a problem with consumer use of devices which will receive interference from the Amateur Service. The consumer is mostly unaware of Amateur Radio and could care less what the Part 15 notice means to him. When they bought it, that is good enough for the consumer and likely never read the notice at all.
