

Dear Sir or Madam:

Commenting as a Registered Professional [Electrical] Engineer and an Honor Graduate of the Georgia Institute of Technology, I believe that the spectrum use plan submitted by SAVI Technologies is an unwise use of radio spectrum to which SAVI is not entitled. I believe that their proposed radio transmission plans will render the entire Amateur Radio band useless for amateur communications and experiments.

I respectfully request that the FCC deny the request for operation in this radio frequency band now assigned to Amateur Radio.

Yours very truly, Charles Quentel, ARS WD9IET
