

Mr. William Caton, Secretary
Federal Communications Commission
445 12th St SW
Washington, DC 20554

Dear Mr. Caton:

I am writing this letter in reference to MM docket number 99-339 the bill making it a requirement for the movie, cable, and television industry to make their movies and television broadcasts accessible to blind and visually impaired individuals. I feel that the efforts to deny us our ability to access information is a step backwards in these modern times of high technology and fast moving life styles. Why would the FCC want to keep a large part of the population in the dark as far as what's going on in a highly competitive world where they are already at a disadvantage. Please help us to be able to access media in a way that will help us compete on the same level as our sighted friends and associates.

Sincerely,

Fred Carter
