

I oppose reallocating Novice/Tech Plus CW subbands, RM-10413, because there are many license holders that have earned the privilege of use. CW is a *very* important method of communication. Reallocation is designed to reduce its use, which is a travesty.

I have a General Class license and will try to upgrade to Extra Class soon, but I don't think the elitists should hog *all* the airwaves.

I don't think ARRL polls are accurate, and I'm a member. I vote to retain the present allocations, and to encourage new and old operators to learn and use Morse code. There are TOO MANY unregulated contests jamming the airwaves, NOT too much spectrum for CW operators. I am a member of ARRL, TARC, and FISTS. SAVE CW.
