RE: ~~RM-10077~~ Modification of Section 90.20 (c) of the Commission's Rules to Permit Use of Any Certified Public Safety Frequency Coordinator for Channels Below 470MHz.

The purpose of this letter is to voice support for the above referenced petition for Rule Making that has been filed by the Association of Public Safety Communications Officials, (APCO).

The goal of the petition was to provide applicants with more choices, improve efficiency, and simplify frequency coordination. It is our position that applicants will benefit from this change, as it will provide them with a choice of coordinators. It will also allow for "one-stop shopping" for applications seeking approval for multiple frequencies.

APCO's petition has been pending for over one year. I urge the Federal Communications Commission to move forward with its consideration of this petition.

Very truly yours,

Willis Carter
Chief of Communications
