

The Honorable Michael K. Powell
Chairman
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

Dear Chairman Powell:

To see the possibility of such actions being considered is truly an injustice. Privately owned ISPs throughout the United States have been able to provide their customers with personal service that makes them unique all in their own way. I do not see how this can benefit anyone except these Baby Bells themselves. It is obvious that something has already been decided between numerous parties who will gain something financially(In their pocket). Please reconsider any actions as they will inevitably result in the amendments being reversed with in a year based on how inefficiently these baby bells already operate. They can barely handle what they have now? I can guarantee that if this goes into place, some larger government part WILL take apart the commissioners of the FCC and put some people in place that are for the best of the US. You dont have to change something that is not broken. Be reasonable and please use common sense.

Sincerely,

Doug Petrie
