RE: RM-10077, Modification of section 90.20(c) of the commissions' rules to permit use of any certified public safety coordinator for channel below 470 MHz.

I would like to express my support for APCO's petition to allow all four public safety coordinators to coordinate any of the public safety pool channels below 470 MHz. This would allow agencies with multiple frequencies to more easily coordinate their frequencies and have to coordinate with multiple coordinators.

Please act on APCO's petition and issue a Notice of Proposed Rulemaking.

Thank you,

Thomas W. Peters
