

We believe monthly Internet service charges for rural health care providers should be a covered service in the Rural Health Care Program. This is a significant expense for us, and a vital resource for providing quality health care. We also believe the application process should be streamlined, if at all possible. We have yet to complete the process. We are completely eligible, but the information requested on the forms is baffling, and carriers have no incentive to assist us. (Assuming they are able to understand them!)
