And there are 256 more channels to choose from

- SelectSAT has 256 national and regional channels!
- And more choices than any other source.

Choose the specific channels or packages you want and create your own individualized menu of programming.

Channels with the red circle ● may be purchased individually. Pay only for what you select. You can add or delete selections whenever you wish. The selection is vast...more than any other satellite or cable service...with more to come!

Ask for the complete price list of SelectSAT channels and discount packages.

See below for some of the selections available now from SelectSAT.

What equipment do I need to enjoy HDSAT?

Outside your home - The only equipment you need is the HDSAT 13" dish. The HDSAT dish is smaller than other satellite dishes that you've seen. Why? The HDSAT satellite is more advanced and more powerful. Compare the diminutive HDSAT dish with other dishes now in use.

Inside your home - You will need a set top tuner and wireless remote for each TV you connect to HDSAT.

In set top tuners, you have three easy choices:

- Set top A - HDsat and Selectsat
- Set top B - Selectsat
- Set top C - HDsat and Selectsat plus a built-in personal video recorder

An HDSAT wireless remote is provided with each tuner. Simply press "Menu" for a complete electronic listing of all HDSAT programming and easy single-click access to the program you want to see.

HDSAT customer equipment and installation is included with the cost of HDSAT programming with an HDSAT subscription agreement for a minimum period, or you can make separate monthly payments for your equipment choice.
