

We have three separate phone lines at home. So, we get three times as many unsolicited calls as the typical person. So whatever level the state determines as acceptable. We are three time over the limit.

When we get calls late at night, say 8:45PM, and I complain to the telemarketer they just say "it's legal until 9PM". My comment on that is how do state law makers know when my bedtime is? I am usually asleep by 8PM and when I am awakened by these calls I can not always go back to sleep.

Please pass a law forbidding all unsolicited calls.

Thank you

John R Wenzel
