

It is IMPORTANT for FCC to STOP this fraudulent BK by Global Crossing as it undercuts other major telecom carriers in their pricing if they come out debt-free with a buy-out from Hutchison, (a bid of only \$250 million cash) when GX itself has \$744 million in the bank. It is evident that the management intends to wipe out all shareholders/creditors to make a quick profit, otherwise it would take several quarters before the share prices go up.

If FCC approves this case, I'm afraid a lot of other telecom/media companies will follow suit as they will come out debt-free once they can collaborate with a foreign company with a scam deal.

Also it is important for FCC to look into the National Security of this network system if Hutchison is really interested in GX.

I am a Canadian citizen, holding Global Crossing shares, with a vision on its unique network system, never realizing that it will be ROBBED by GX management in declaring a fraudulent bankruptcy. I am using the address of my brother in L.A. who happens to own GX shares.
