

Dear sirs:

I object to the transfer of licenses from the old Global Crossing to the new Global Crossing. To allow a company to submit a restructuring plan that sells the company to a Chinese conglomerate "Hutch-Sing" and deny original American investors the right to participate is toatally wrong. Please vote to stop this plan for the security of America and for the common good of all the existing shareholders. Alternative plans that are worth more money to the creditors and keeps the new company under American control will surface as soon as the exclusivity period is ended in late January 2003. Make a difference! Vote against the current plan by refusing to transfer the licenses.
