

Dear Sir or Madam, It is very important to me and many other people (everyone I've ever talked to!), to keep IN law just as it is. Many folks have a hard time getting to their phones and are very annoyed at being interrupted all through the day and evening. Our phones are for OUR convenience. Our family is so much more relaxed at home...it has been a HUGE blessing. We used to get 4-6 calls an evening. It becomes very stressful to have to argue with these people to leave you alone. They simply NEVER give up. I do not want to back to that EVER. Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Please put the peoples rights and wishes ahead of other's profits....as it should be! Thank you
