

Please do not do anything that would weaken the Indiana no-call list. The Indiana no-call list has been a god-send for my phone. Please do not fall for the "free speech" argument. Or the cost of marketing argument. The hundreds of calls that I used to get per year is now reduced to only a handful. A phone line is a necessity it's not something that I can give up to avoid the calls. I can actually answer the phone when it rings instead of waiting for callerID or my machine to screen the out-of-area (or Private) calls.
