

We are concerned citizens who hope to have a voice in this matter. We are concerned that the FCC is wanting to take away our privacy law. You have no idea how wonderful it's been not having to answer those blasted calls. We used to receive about 15-20 per week or more and we maybe get 1 a month. This law has been a true help and to take it away would mean that I am taking away time from my children and family time. Homework at this house can be quite a lot and I answer the phone more than I have to now. You add telemarketing back in and believe me it will be worse than before. This Privacy Law as made a big difference in our calls. Please do not change the law back. We need this privacy law. Thank you
