

I am commenting on the action to diminish the no call law in Indiana. I would receive calls all day and all evening interrupting family and private time as many as 10-12 each day. I do not feel that I should have to pay extra for the privacy of my own home. I guess we can just stop using public phone lines and use only cellular. Please reconsider your thoughts on this. It has been wonderful to not have to deal with these constant interruptions in our home.
