Relative to **IB DOCKET No. 02-286**

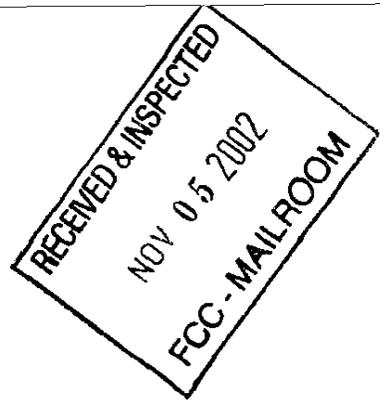

To Whom **It** May Concern:

During **January** of this year Global Crossing **announced** that they **were** filing for Chapter 11 **bankruptcy protection**. This **bankruptcy**, following in the steps of **Enron**, caused **severe** hardship among **employee/shareholders**, as it appears that our 401K plan containing **Global Crossing** stock is **now** virtwllly worthless. During this **past month** it was **announced** that a **re-structuring** plan **has been approved** by the **bankruptcy judge**, resulting in **Hutchison Whampoa (Hong Kong & Singapore companies)** having controlling interest in this new company. ■ **This action is approved** not only will **shareholders/employees** be affected by the actions of this **company**, but also **the** very security of this country. I am **very concerned** about the '**National Security Risk**' that this **sale poses**. If approved by the Federal Communications Commission, **the** Chinese, **would now** have controlling interest in the largest **private optic network** in the world. This would **result** in the **Chinese** controlling **between 20% and 25% of the fiber** optic capacity coming into and going out of the United Statu. This, I feel, has **the** potential for a great **security risk**, as undoubtedly, **military operations** will **be among** the governmental agencies that will **be** using this capacity. ■ **am** as a result, asking that the FCC **please investigate** the potential problems that will **occur** as a **result** of this sale. ■ **These concerns are found** to have merit I ask that you deny **approval** of the license transfers, ultimately stopping the **sale** of Global Crossing. I **would appreciate** a **response** to this letter.

Thank you,

During January of **this** year **Global Crossing** **announced** that they **were** filing **for** Chapter 11 **bankruptcy protection**. This **bankruptcy**, following in the steps of **Enron**, caused severe hardship among **employee/shareholders**, as it appears that our 401K plan containing **Global Crossing** stock is **now** virtually **worthless**. During this past month it was **announced** that a **re-structuring** plan has been approved by the **bankruptcy judge**, resulting in **Hutchison Whampoa (Hong Kong & Singapore companies)** having **controlling** interest in this **new** company. **If** this action is **approved** not only **will** **shareholders/employees** be affected by the **actions** of this company, but also the **very** security of this **country**. I am very **concerned** about the **"National Security Risk"** that this sale **poses**. **If** approved by the **Federal Communications Commission**, the **Chinese**, would **now** have **controlling** interest in the **largest private optic network** in the **world**. This would result in **the** **Chinese** controlling between **20% and 25%** of the fiber optic capacity coming into **and** going **out** of **the** **United States**. This, I feel, **has** the potential for a great **security risk**, as **undoubtedly**, **military operations** will be among **the** **governmental agencies** that will be using **this capacity**. I am as a **result**, **asking** that the **FCC** please **investigate** the potential **problems** that will **occur** as a **result** of this sale. **If** these **concerns** are found to **have** merit I **ask** that you **deny** approval of the license transfers, ultimately **stopping** the **sale** of **Global Crossing**. I would appreciate a response to this letter.

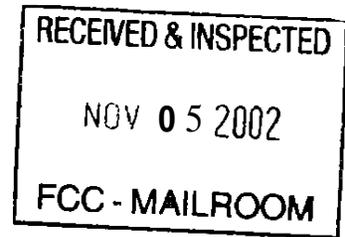

Thank you,

Shonda Stoppleworth

To Whom It May Concern:

During January of this year Global Crossing announced that they were filing for Chapter 11 bankruptcy protection. This bankruptcy, following in the steps of Enron, caused severe hardship among employee/shareholders, as it appears that our 401K plan containing Global Crossing stock is now virtually worthless. During this past month it was announced that a re-structuring plan has been approved by the bankruptcy judge, resulting in Hutchison Whampoa (Hong Kong & Singapore companies) having controlling interest in this new company. If this action is approved not only will shareholders/employees be affected by the actions of this company, but also the very security of this country. I am very concerned about the "National Security Risk" that this sale poses. If approved by the Federal Communications Commission, the Chinese, would now have controlling interest in the largest private optic network in the world. This would result in the Chinese controlling between 20% and 25% of the fiber optic capacity coming into and going out of the United States. This, indeed, has the potential for a great security risk, as undoubtedly, military operations will be among the governmental agencies that will be using this capacity. I am as a result, asking that the FCC please investigate the potential problems that will occur as a result of this sale. If these concerns are found to have merit I ask that you deny approval of the license transfers, ultimately stopping the sale of Global Crossing. I would appreciate a response to this letter.
