Amendment of 73.202 (b))
Table of Allotments)
FM Broadcast Stations)
(Taloga, OK))

MB Docket No. 02-302
RM-10579

To: John Karousos, Assistant Chief
Audio Division of the
Media Bureau

PETITIONER'S COMMENTS

1. Petitioner respectfully submits that the public interest would be served by allocating Channel 226A to Taloga, Oklahoma, as that community's first local aural broadcast transmission service. Taloga, Oklahoma is a community of over 350 people. Taloga has its own mayor, Ron Cox, its own post office, its own volunteer fire department, its own school district and a number of local churches. The proposed channel 226A will provide additional diversity and an outlet for local self-expression to Taloga residents and therefore is in the public interest.

2. **As** the Commission is aware, this is one of a number of petitions filed by this Petitioner and other like-minded petitioners. The purpose of filing such petitions is to seek allotments to relatively small communities which are sufficiently removed from major metropolitan areas that there is no prospect that the allotment is merely a step to inaugurate still another facility serving a major broadcast market. These petitions seek allotments to relatively small communities in their own right. For reasons stated above,

the instant petition merits the requested allotment under established principles in Section 307(b) of the Communications Act.

3. The filing of a number of similar petitions has its genesis in the recent development in radio broadcasting of Localized Network Programming. This is a concept that has been developed by the major broadcasters for essentially mid to major markets. It is an approach that provides the economy of a network but the feel and appearance of local programming. The belief of the Petitioner and like-minded petitioners is that such a plan will work with small market communities on a regional basis. Given a geographical area, such as Eastern Oklahoma, Western Oklahoma, North East Texas, West Texas, South Texas, etc., the licensees of FM stations in small communities of a given region – whether the petitioners themselves or other licensees who might successfully outbid them for the license – could initiate unique network programming designed specifically for that region and additionally provide localized community inserts, such as local weather, local events, programming from specific remote locations, regional-specific news, public affairs, public service announcements, promotions and other programming giving life to the commission's policy favoring localism in broadcasting. While there would be local sales, the focus would also be in regional network sales, drawing on the advantages of advertising to the region and the unique nature of the region.

4. The vision is that providing radio service to an area of, say, 5,000 people may not allow for the operation of a traditionally run radio station. However, a network of ten stations in an identifiable geographic area covering, say, 50,000 people could very well be economically viable. This concept is an approach to providing radio service to

clusters of stations in small communities in the nature of modern radio developed by the major group owners for mid and large markets. Such a concept – in lieu of allotting the frequencies to communities in or adjacent to major radio markets – provides a further public interest reason in support of the Petition under Section 307(b).

5. Should this petition be granted, and Channel 226A be allotted to Taloga, Oklahoma, Petitioner will apply for Channel 226A, and after it is authorized, will promptly construct the new facility.

The information provided in these Comments is correct and true to the best of my knowledge

Respectfully submitted,

Robert Fabian
