

Regarding the proposed sale of Global Crossing to foreign entities,

I see Global Crossings in the hands of a foreign entity as a MAJOR SECURITY threat to the USA.

Global Crossing is a vital piece of USA infrastructure no less important than our Telecommunication systems, Highway system, Railroads, Waterways, Shipping Ports and Rights of way.

Approving the sale of Global Crossing to any foreign entity with an opposing aggressive political system is tantamount to the USA selling the Panama Canal to the Japanese prior to WWII.

History will be unkind to those who participated.

I strongly object to this pending sale and request a thorough investigation into the matter. The proposed sale of Global Crossing as filed in conjunction with the bankruptcy filing should be immediately halted and not approved.

I cannot see one benefit by any person in the USA resulting from the sale of Global Crossing to Hutchison and Li Kashing.

Respectfully Submitted,

Alex Packard
