

I continue to get junk mail despite my efforts to opt out. I also get unsolicited phone calls at home from solicitors without my permission. I don't understand how the laws can allow this harassment. I am tired of it, and I want to know what I can do to stop it. I also need to know who to write to in order to get laws changed to handle this problem properly.

I am ready to take legal action against these companies. I need to know what laws are in effect and what I can do to improve laws to stop this harassment.

Thank you.
