

I am writing to express my concern over the Global Crossing proceedings. I sent a comment about three weeks ago , but it evidently never made it to you because your system was down. I am concerned that you did not get other comments from other people as well. In view of your system being down or not working the way it should, I think you should extend the time that comments can be made.

My concern with the Chinese owning controlling interest in the new Global Crossing is one of national security. In light of all the problems in the world, we don't know what country will be our next threat. In the interest of national security I implore you to not let the Chinese control a major portion of our communications backbone. Please investigate this re-structuring very thoroughly, something doesn't seem right about the whole deal.

Thank You,
Jim Boltjes
