

Dear FCC,

I am writing to express my outrage at the current bankruptcy proceedings regarding global crossing. Not only were stock holders lied to continuously by the management, but the same management team made millions of dollars through insider trading and are still poised to maintain some control of the company post-bankruptcy. Then to add the the insult, this great assett paid for by hard-working americans may be sold to the chinese for a fraction of it's real value. This is a major security risk for the United States. China is still essentially a communist country with major human rights vilolations.

I sincerely request that the FCC block any attemps to sell or allow control of the GX assetts to a Chinese controlled company. There are certainly other alternatives to the GX reorganization that can at least in part, include the common shareholders. The hard working citizens of the United States.

Thank you,

Paul Matulef
