Welcome to TCMC

Terrebonne General Medical Center has come a long way since its founding in 1954. The original 65-bed Terrebonne Parish General Hospital has evolved into a 304-bed medical center that is the only hospital in Louisiana to receive the distinguished United States Senate award for Innovation.

Today we have one of the most advanced medical centers in the United States. We have regularly been first in the state, and even in the nation, to pioneer promising new cardiovascular technologies. We pride ourselves on offering the most up-to-date medicine right here in our own community.

We are now the first hospital in South Louisiana that is home to the revolutionary new treatment for brain cancer, the Gamma Knife. It allows surgeons to quickly, safely and painlessly treat brain tumors, vascular malformations, certain types of facial pain and epilepsy. No other hospital has made such impressive strides in making revolutionary, lifesaving technology a first priority.

Welcome to our website. Please take a few minutes to explore and see what services TCMC has to offer you and your family.

TGMC's Background

- Navigation
- Background
- Timeline
- Our Leader
- Board of Commissioners
- Our Vision / Mission

Terrebonne General Medical Center is a public, non-profit integrated healthcare system consisting of a 321 licensed bed (304 staffed bed) acute care facility complete with rehabilitation and skilled nursing units, a psychiatric center, an outpatient surgery center, emergency care services, primary care services, an occupational health program, and a community outreach center. TGMC's main campus is located in Houma, Louisiana - in the heart of the "Bayou Country".

The medical center serves as a major economic force for the community with a staff of over 1500 employees.

Terrebonne General Medical Center, which

celebrated its 40th year of service in 1994, takes pride in being the largest **community**-based hospital in the tri-parish area of Terrebonne, Lafourche, and St. Mary parishes. The medical center serves as a major economic force for the community with a staff of over 1500 employees. In addition, the hospital currently has a medical staff of over 170 registered physicians offering a variety of specialties ranging from family practice to cardiovascular surgery.

[Click here to learn more about Gamma Knife](#)

TCMC is accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO), the national body that ensures that member hospitals meet established standards for quality of patient care. The medical center is also a member of Premier, a consulting organization of several hundred quality hospitals throughout the entire United States.

Terrebonne General Medical Center is also a member of the Louisiana Hospital Association, and the American Hospital Association. •

Program I: Leonard J. Chabert Medical Center

Program Authorization: Act 38 of 1973; Act 25 of 1974; Act 744 of 1985; and Act 3 of 1997

PROGRAM DESCRIPTION

The mission of the Leonard J. Chabert Medical Center is to provide acute general medical, surgical, psychiatric, inpatient and acute/chronic ambulatory medical care for the medically indigent, uninsured, Medicaid and Medicare eligible patients, and self-paying patients. The goal of Leonard J. Chabert Medical Center is to provide the highest level of acute general medical and specialty services of medicine, surgery, obstetrics-gynecology, ophthalmology, urology, orthopedics, pediatrics and critical care to all patients, including: the medically indigent, Department of Corrections inmates, the insured, Medicare and Medicaid eligible and self-paying patients of the hospital's service area.

The goal of Leonard J. Chabert Medical Center is to ensure that quality health care is provided to the community in the most effective and efficient manner possible. Leonard J. Chabert Medical Center is committed to serving as a community medical center of excellence where knowledge heals and people care. It is also the intent of this facility to provide the best quality of care to everyone who comes into its sphere of influence.

Leonard J. Chabert Medical Center (CMC), located in Houma, Louisiana, was originally dedicated in 1978 as South Louisiana Medical Center under mandates of the 1973 and 1974 legislative sessions. It was renamed in 1992 in honor of the late state senator who was instrumental in getting the facility established. CMC was built to accommodate the general health care needs of the population, and particularly the indigent, in a five-parish area near the Gulf of Mexico southwest of New Orleans. These parishes include: Assumption, Lafourche, Terrebonne, the western portion of St. James, and the eastern portion of St. Mary. The hospital provides additional support functions such as pharmacy; blood bank; respiratory therapy; anesthesiology; and various diagnostic services and other support functions of a non-medical nature, such as administration; maintenance; housekeeping; mail service; purchasing; accounting; and admissions and registration. The facility also maintains a stipend program for medical residents and contracts for physician and anatomical services and works cooperatively with medical schools and other health education institutions to broaden the opportunity for clinical training in the hospital. The hospital is currently staffed for 144 beds.'

OBJECTIVES AND PERFORMANCE INDICATORS

Unless otherwise indicated, all objectives are to be accomplished during or by the end of FY 1999-2000. Performance indicators are made up of two parts: name and value. The indicator name describes what is being measured. The indicator value is the numeric value or level achieved within a given measurement period. For budgeting purposes, performance indicator values are shown for the prior fiscal year, the current fiscal year, and alternative funding scenarios (continuation budget level and Executive Budget recommendation level) for the ensuing fiscal year (the fiscal year of the budget document).

1. (KEY) To continue to provide professional, quality, acute general medical and specialty services to the patients when medically appropriate, the percentage of outpatient services.

SOURCE OF FUNDING

This program is funded with Interagency Transfers, Self-generated Revenue and Federal Funds. The Interagency Transfers represent Title XIX reimbursement from the Medicaid program for services provided to Medicaid eligible and "free care" patients. The Self-generated Revenue represents insurance and self pay revenues for services provided to patients who are not eligible for "free care". The Federal Funds are derived from Title XVIII, Medicare payments for services provided to Medicare eligible patients.

\$0	\$58,108,515	873	TOTAL RECOMMENDED
\$0	\$97,505	873	DIFFERENCE (TOTAL RECOMMENDATION AND EXISTING

The total means of financing for this program is recommended at **100.2%** of the existing operating budget. It represents **81.1%** of the total request (**\$71,702,273**) for this program. The overall net increase in this program is a result of the transfer of additional Ryan White Federal Funds from the Office of Public Health for HIV medications and an increase for equipment maintenance contracts. This increase is offset by a reduction in **Risk** Management premiums and a reduction of **8** vacant positions. These changes should have no significant impact on the delivery of services.

Industry

Employment is booming in Terrebonne Parish and for a good reason - our parish has a strong group of businesses working together to make the local economy strong. From oil and gas to retail, to seafood - Terrebonne has the industry to support our more than 105,000 residents.

Here in Terrebonne Parish, we do not just have the industry to provide a healthy economy, but we also have a strong civilian labor force, totaling over 49,000. Need more workers? Terrebonne Parish employers have easy access to the entire labor force in surrounding regions - over 70,000 workers.

Major Industries

Oil and Gas

Louisiana's supply of oil, natural gas and mineral resources has been a great source of the state's wealth for several decades. As a coastal parish, Terrebonne Parish contributes to Louisiana's hold on the oil and gas industry by offering a prime location for many oil and gas-related businesses to flourish. Major oil and gas corporations are located in the area, as well as Terrebonne's seemingly unending list of oil and gas service companies.

Metal Fabrication and Machining

Metal fabrication and machining companies in Terrebonne Parish manufacture metal or fabricated steel products for a variety of uses, including the manufacture of parts and equipment for the oil and gas service companies. Metal fabrication and machining companies are one of the largest sources of employment in Terrebonne Parish.

Marine Services

The marine services industry thrives primarily on providing marine transportation services. This sector has businesses in a variety of activities, from tug boat companies that transport barges stocked full of goods, to crew boat and supply boat companies that transport personnel and supplies for many of the area's oil and gas companies.

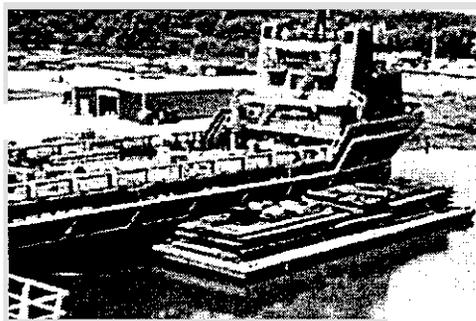

Shipbuilding and Repair

Several local shipbuilding companies take advantage of Terrebonne Parish's need for boats to service the offshore petroleum industry. Many of these companies also thrive on the building of

government-contracted military ships, as well.

Retail

Approximately 500 retail establishments flourish in Terrebonne Parish, together employing around 7,000 people. Annual retail payroll figures in Terrebonne Parish top \$113 million. Retail businesses in the area can offer virtually any sort of product imaginable: automobile parts, clothing, specialty food items, home furnishings, gardening supplies, and much, much more.

Medical Services

The medical service industry is one of the top employers in the parish. Terrebonne General Medical Center (TGMC) employs almost 1,500 people, and offers 321 licensed beds. Another large area hospital, Leonard J. Chabert Medical Center, employs almost 1,000 workers, and offers patients over 200 beds. Terrebonne Parish is home to a vast array of other medical facilities, including dentistry, psychiatric care, surgical clinics, chiropractic clinics, and ophthalmology offices.

Seafood

South Terrebonne's easy access to the deeper waters of the Gulf of Mexico has helped provide work for local commercial fishermen for decades. The Gulf of Mexico offers fishermen a terrific supply of marine life, including shellfish like crabs, oysters, and shrimp, and a host of other fish as well. Parish economic activity generated from commercial fishing has increased with the ability to process the catch, package it, and finally distribute it.

Advancements for Business

Because our parish leaders understand how important business is to our economy, they have worked hard to make Terrebonne Parish a business-friendly environment.

Area colleges, universities, and vocational-technical schools at all levels are increasing industry-specific training in their curriculums. They are also developing partnerships with industry that involve human and technological development. By doing so, Terrebonne area schools are helping to ensure that new and expanding businesses will have a continuous pool of workers with the level of education and expertise necessary for all their operations.

The parish has 20 specifically designated industrial sites, ranging from less than 100 acres to approximately 9,000 acres - plenty of room to grow a business of any size. The sites are located across the parish in Houma, Bourg, Gibson, and Schriever. Many of these sites offer access to railroads and waterways.

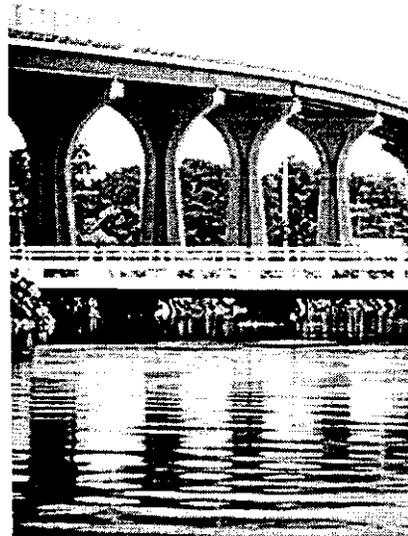

Entrepreneurs will be happy to find many unused and underused industrial sites within Terrebonne, offering opportunities for private or joint public-private

redevelopment. Sites are available along the Intracoastal Waterway (ICWW), and near air, rail, and highway barge transportation systems.

Transportation

Businesses in Terrebonne Parish benefit from our efficient, well-planned highway system. US-90, the parish's main transportation artery, curves across the northern portion of Terrebonne Parish, heads northeast towards New Orleans and northwest through Assumption Parish towards Interstate Highways 10 and 49. LA-20 lines the northwestern border of the parish, LA-24 curves around the northeastern portion of Terrebonne through Houma, and LA-56 and LA-57 travel north-south from Houma to the southern areas of the parish.

Terrebonne-area businesses have little trouble with transportation, since the parish has access to a large number of transportation means.

Nationwide passenger service can be found with Greyhound Bus Lines. The New Orleans International Airport, roughly a one hour drive from Houma-Terrebonne Chamber of Commerce, is the nearest commercial airport and largest in the state. All major domestic airlines, as well as several international carriers, serve the airport. Local bus transportation is provided by Good Earth Transit.

For private aircraft needs, Terrebonne Parish can turn to the Houma-Terrebonne Airport and the Thibodaux Municipal Airport. Both accommodate private and corporate aircraft, and are among the busiest general aviation facilities in the state.

Southern Pacific ships out freight via rail, whose tracks run through the town of Schriever. All major motor freight carriers service Terrebonne Parish. Waterway transportation routes are abundant in Terrebonne Parish, the largest of which is the 19,000-mile Mississippi River System. This system allows cargo from Terrebonne Parish to be delivered to all of mid-America. The Intracoastal Waterway (ICWW), a path that rims the coastal inland of the northern Gulf of Mexico, runs east-west through central Terrebonne Parish. The Houma Navigational Canal runs north-south from Houma to Cocodrie and into the Gulf of Mexico. Port Fourchon, located a few miles away in southern Lafourche Parish, provides shallow draft access.

The nearest deepwater ports are roughly an hour away at the Plaquemines Parish Port and the Port of New Orleans, which operates a foreign Trade Zone. The Louisiana Offshore Oil Port (LOOP) is also nearby in the Gulf of Mexico, serving as the nation's only "Super Port." LOOP is designed for oil tankers that cannot navigate inland waters, shallow or deep draft.

Local parcel service is provided by Airborne, Emery, United Parcel Service, Federal Express, and the United States Postal Service.

In Conclusion

There is no mystery behind Terrebonne Parish's performance. Whether it is our convenient and easy-access location, our selection of transportation

routes and services, our labor force, or our diverse group of industries, nothing comes remotely close to the business opportunities in Terrebonne Parish.

ATTACHMENT M

TECHNICAL ANALYSIS

The attached maps were prepared by Arthur M. Hoover of Technical Services Group, 12015 Cloverland Court, Baton Rouge, Louisiana 70809.

Figure 1 shows the area in which a fully-spaced Channel 281C0 facility could be located. The area to the east is constrained by an arc from the proposed reference point of the proposed Westwego Channel 279C0 allocation. There is significant area to the east of the Westwego reference point in which a transmitter could be located and still provide a 70 dBu signal to the entire New Orleans Urbanized Area. If the transmitter for a relocated WUSW-FM were moved to the east, it would open additional area in which the Gonzales Channel C0 transmitter could be located. In addition, the area to the west of the specified point is constrained by a spacing arc from a Channel 282C2 at Bunkie, Louisiana. There is a pending application to modify the license of station KEZP to operate that station on Channel 282C2 from a location 30.97 kilometers from Bunkie on a bearing of 315.5 degrees. See BPH-20010515AAG. Grant of that application will pull the required spacing contour to the northwest by approximately 20 kilometers and make substantially more area available in which a station on Channel 281C0 could be located, thus permitting a significantly greater amount of coverage of the Baton Rouge Urbanized area.

Figure 2 depicts the predicted 70 dBu coverage from the point in the open zone shown on Figure 1 that is closest to Baton Rouge.

Figure 3 depicts the coverage of the Baton Rouge Urbanized Area that would result from a maximum facilities Class C0 station located at the point shown in Figure 1.
