

In the past we have taken action against many monopolies (AT&T for one). If we allow access to the internet exclusively through the largest ISP's, we in fact are creating monopolies - instead of fighting against them. The current rates being charged by local companies such as Verizon is already criminal in my mind. If this ruling passes, the bell operating companies and all dial tone providers will certainly not lower prices - they will be free to charge what ever they want. Internet access MUST remain available at reasonable prices to ALL !!! The local ISP's are a vital part of the internet community. PLEASE - YOU HAVE THE POWER TO STOP THIS LATEST MONOPLY IN THE MAKINK - SAVE OUR LOCAL ISP's. Thank you.
