

It is an outrage that Verizon takes advantage of small companies. The government went after Microsoft for the same reason but to no avail. It is sad that when a contract is signed with Verizon their attitude is tough luck when they raise rates. If a small company tried any of this nonsense they would lose the lawsuit without a trial. It would be settled out of court before motions were submitted. This country was built on small business and honest working people. Verizon should be shut down for good. I'm sure there are a lot of other honest companies who would gladly take their place and do a lot better job. What has happened to business in the U.S? If you don't have the funds to pay for top attorneys or pay some Congressman under the table you get nowhere. As a civil servant the FCC should seriously look into the Verizon nightmare. I urge you to take immediate action against Verizon.
