

The majority of ISPs have been prevented from selling DSL by ridiculously high prices on access to the phone network, it is very expensive and doesn't help the consumers to have these prices constantly raised. The consumers need a voice for competition and not monopolistic practices. Please do your job by helping the consumers of America to ensure fair pricing and allowing the ISP's to continue to be able to give us prices we can afford in this economy where many have lost their jobs. Thank you
