

gulftel has a monopoly on this area, will not allow other providers in the area, it provides less than advertised services, on a dsl line of 1.1 mbps it will only provide less than half on a given day. On it's dail up it might provide a 14.4 when it advertises a 46.8. a speed test provides all the info for fraud, or misadvertising, and does so on a regular basis.

I feel defrauded by their advertising.

Thanks in advance

Cindi
