Ex Parte Notice

Re: Implementation of Section **11** of the Cable Television Consumer Protection and Competition Act of **1992**, CS Docket No. **98-82**; Implementation of Cable Act Reform Provisions of the Telecommunications Act of **1996**, CS Docket No. **96-85**; The Commission's Cable Horizontal and Vertical Ownership and Attribution Rules, MM Docket No. **92-264**; Review of the Commission's Regulations Governing Attribution of Broadcast and Cable/MDS Interests, MM Docket No. **94-150**; Review of the Commission's Regulations and Policies Affecting Investment in the Broadcast Industry, MM Docket No. **92-51**; Reexamination of the Commission's Cross-Interest Policy, MM Docket No. **87-154**.

Dear Ms. Dortch:

On January 13, 2003, representatives of Comcast Corporation ("Comcast") met with representatives of the Media Bureau to discuss the above-captioned rulemaking. Comcast was represented by James R. Coltharp, Senior Director, Public Policy, and by Michael H. Hammer and the undersigned, both of Willkie Farr & Gallagher. The Media Bureau was represented by Bureau Chief W. Kenneth Ferree; Bureau Chief of Staff Deborah E. Klein; Deputy Bureau Chief William H. Johnson; Paul Gallant, Special Advisor to the Bureau Chief; Royce Dickens Sherlock, Chief of the Bureau's Industry Analysis Division; and staff attorneys Will Cox and Adam Candeub.

The discussion centered on points covered at length in Comcast's comments and reply comments (filed January 4 and February 19, 2002, respectively), as well as Comcast's Comments on OPP Working Paper No. 35 (filed July 18, 2002). The attached *summary* was also **used** as a basis for discussion. In addition, to illustrate the extraordinary abundance and diversity of video programming that is currently available to American consumers, we exhibited a Comcast Cable Guide for a local cable system. Pages A160-A166 of that guide (copies attached) reflect the literally *thousands* of diverse program offerings that a *single* MVPD makes available in a single market on a single day. The continuing availability of such an abundance of diverse

Marlene H. Dortch, Secretary
January 14, 2003
Page 2

programming is ensured by, among other things, the marketplace reality that a cable company that fails to deliver the programming consumers want will face immediate defection of customers to other MVPDs that *do* provide that programming.

This letter is filed pursuant to section 1.1206(b)(2) of the Commission's **rules**. Copies are being sent to all of the Media Bureau representatives mentioned above. Please let me know if you have any questions.

Respectfully submitted,

James L. Casserly

THE RECORD DOES NOT SUPPORT IMPOSITION OF A STRICT LIMIT ON CABLE HORIZONTAL OWNERSHIP.

I. THE FCC'S AUTHORITY TO ADOPT A CABLE HORIZONTAL OWNERSHIP RULE IS LIMITED. IT MAY ONLY ADOPT A RULE TO THE EXTENT NECESSARY TO PREVENT A CABLE OPERATOR FROM UNFAIRLY IMPEDING THE FLOW OF VIDEO PROGRAMMING TO CONSUMERS.

- Congress authorized the horizontal ownership limit to “ensure that no cable operator . . . can unfairly impede . . . the flow of video programming from the video programmer to the consumer.” The FCC’s job is *not* to allocate surplus between networks and distributors nor to guarantee that every network can succeed by gaining carriage on a cable system.
- The courts have clarified that, in accounting for cable operators’ First Amendment rights, any ownership rule must be based on ‘substantial evidence’ of impediments to the flow of video programming to consumers, *not* “mere conjecture.”
- Comcast has no objection to a reasonable, rationally-based ownership limit that is consistent with the statutory and judicial direction and reflects the realities of the current MVPD marketplace. As shown below (and in the record), however, there is no evidence (let alone substantial evidence) that justifies a strict ownership limit.

II. THE RECORD IN THIS PROCEEDING DEMONSTRATES THAT THE FLOW OF PROGRAMMING IS NOT IMPEDED AND THAT CONSUMERS CAN ACCESS AN UNPRECEDENTED ABUNDANCE OF VIDEO PROGRAMMING.

- In analyzing whether cable ownership impedes the ability of program networks to reach consumers, the FCC must focus on all of the various mechanisms by which such networks can be created, aggregated, and distributed.
- In 1992, consumers typically had access to only a single MVPD. Today, the vast majority of consumers have a choice of three MVPDs, and many have four. Additional sources of programming include broadcast TV (with DTV creating the opportunity for each licensee to offer multiple program streams), MMDS, and SMATV (to say nothing of video stores and movies-by-mail). VDSL, MVDDS, and streaming video will soon be a growing part of the **mix**.
- MVPDs other than established cable operators now serve **over 24 million** U.S. MVPD households. Even more important, as the *Time Warner II* court concluded, is the vastly higher number of consumers who *can* switch (at low cost, and on a moment’s notice) if their cable company does not provide the programming the consumer wants. The FCC must take account of the impact of DBS because, “[i]f an MVPD refuses to offer new programming, customers with access to an alternative MVPD may switch.” This competitive environment severely constrains cable operators’ abilities *to* impede the **flow** of video programming to consumers.
- *Far from* constraining the flow of programming, cable operators are doing everything they can to increase it. Tens of billions of dollars worth of cable system upgrades and rebuilds have led to a vast expansion of capacity to accommodate even more video programming as well as to provide new and innovative services that consumers demand. Meanwhile the percentage of networks that

are vertically integrated with cable operators has declined from 53% in 1994 to 20.6% in 2002, and the number of unaffiliated programming networks has increased from 45 in 1992 to **245** in 2002.

- Cable operators' abilities to impede consumers' access to video programming even on their own cable systems is further diminished by broadcasters' must-carry rights and by the bargaining power of networks that are affiliated with other must-have networks.
- None of these market dynamics and realities were reflected in the FCC's "experimental economics" study. The experimental conditions did not even remotely replicate real-world market structures, participants, or negotiating conditions, much less attempt to capture the mechanisms by which programming flows from program creators to consumers. Contrary to the explicit admonition of *Time Warner II*, the experiment made no effort to account for the dynamics of the MVPD market, including most particularly the ability of consumers to switch among service providers in response to the video programming menus they offer.
- In short, the record provides no support for a strict ownership limit. Nor is there record support for an approach that would impose an especially stringent limit on the basis of a cable operator's vertical integration or its ownership of clustered systems. Of particular note with respect to clustering, not a single shred of evidence indicates that clustering enhances a cable operators' ability or incentive to impede the flow of video programming to consumers. Accordingly, a rule based on such a theory truly would be "mere conjecture" and speculative.

III. ANY HORIZONTAL LIMIT ADOPTED MUST ALSO COMPORT WITH SOUND PUBLIC POLICY PRINCIPLES.

- **Clear and Certain:** Innovation and investment will best be promoted by rules that draw clear lines as to what is permissible. Without a clear and certain rule, a cable operator may refrain from acquiring systems that would otherwise benefit from new investment to upgrade services and improve customer service. Lack of clear guidance would also increase the burden on the FCC, which will be drawn into unnecessarily prolonged proceedings to review each proposed transfer of control on an ad hoc basis.
- **Attribution Rules:** No credible evidence justifies eliminating the single majority shareholder exemption or reinstating the program-sale embellishment to the insulation criteria. Moreover, any horizontal ownership rule the FCC now adopts should recognize that the current attribution rules count "ownership" of subscribers served by an entity that the attributed operator neither controls nor influences.
- **Burdens on Speech:** Per *Time Warner II*, any horizontal ownership limit must not burden speech more than is necessary; any rules must be based on a "record that validates the *regulations*, not just the abstract statutory authority." As the court noted, "assuming the validity of the premises supporting the FCC's conclusion that a 40% 'open field' is necessary . . . , the statute's express concern for the act of 'any individual operator' would justify a horizontal ownership limit of 60%." To the extent the FCC may now wish to adopt a limit below that level, it is bound to do so in a manner that is fully justified by the record, consistent with the limited statutory purpose, cognizant of the dynamics of an intensely competitive market and the myriad ways by which programming can flow from creators to aggregators to distributors to consumers, and minimally burdensome on cable operators' First Amendment rights.
