Trading Areas (MTAs) (used for assigning PCS A & B licenses) and Metropolitan Statistical Areas (MSAs) and Rural Service Areas (RSAs) (used for g Cellular A & B licenses) do not coincide exactly with BTAs, therefore licenses assigned via MTA, MSA, or RSA may be noted in multiple BTAs. As the licensees listed under each cellular block (A or B) do not compete against other cellular licensees in their block, rather each is licensed to serve a geographic region of the pertinent BTA and competes against the other cellular carrier and operating PCS and ESMR carriers in the BTA.
e are multiple carriers within a license block in a particular BTA, the block is filled in as "currently providing service" if any one of the carriers is g service in the BTA. This chart lists only licensed facilities-based carriers, not resellers.
Auction 35 licenses – non-Nextwave/Urban Communications.
