<sup>1</sup> The count of systems offering local origination and leased access cable channels is underinclusive. If a program or industry guide specifically referred to "local origination" or "leased access," such references were logged under tallies for those generic categories in the "Local/Regional" section at the beginning of each convergence market's cable chart. Many locally originated cable programs, however, were listed by their specific titles in the program guides consulted by Media General's researchers. These programs were then listed in the cable charts under the program titles. Nonetheless, these shows usually represent "local origination" or "leased access" programming, even though they were charted separately and not included in the totals listed above.
