

Do not abandon the US the citizens of this great country who use the internet using local and national ISP's. Do not suspend the the current laws and rules governing competition and hand our heads over the the large Phone Companies who only care about their own back pockets and promising to line yours. If you abandon us to the wim and will of the phone companies and give them free reign over internet services we are the people who will be hurt. Are you really so stupid to think that this would go unnoticed??? Or do you not give a damn?? ISPs and CLECs will die, consumers will be deprived of choice and the FCC will be wholly to blame for the travesty. DO NOT DO IT. Chairman Powell: Please do not sell out to BIG BUSINESS, at the expense of competition and the small businesses of our country.
