

Keep the playing field level so that local ISPs can survive and prosper. They support and help our local communities more than the multinatiolnals. Competition is good for those of us in smaller cities. Please do not lift the dominant classification from the Local Exchange Carriers (Bells), because it will lessen competition and result in poorer service to me as a consumer. There is a NEED for access to small and local ISPs and smaller communication companies. Please do not put any rules in place to again centralize the telecomm industry.
