

I have been receiving a heavy volume of unsolicited faxed advertisements on my home/personal fax machine. I have repeatedly called the numbers for removing my number from their database, but I continue to receive faxes. Today I was able to get a company to tell me that they used a 3rd party for their faxes, called fax.com.

I am very frustrated. Our family does not have a lot of money. These people are using up ink and paper that I can't really afford to replace. I am expecting an important fax from a doctor, so I can't disconnect the fax. I worry that the doctor may not be able to get his fax through because of the glut of advertising faxes coming in. Thank you for your time, Hallie Peterson
