The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit **my** choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. **As** a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Gary & Carole Olson

Subject: UNE-P

February 6, 2003

Dear Commissioner:

I ask your support for the continued availability of the "UNE-Platform."

I am an ordinary consumer who uses New Rochelle Telephone Company which offers local telephone service in New York. The company has achieved increasing success largely because it utilizes the combination of "unbundled network elements" - the UNE-Platform - to serve customers. It is absolutely critical that competitive local carriers have continued access to the UNE-Platform to remain competitive, and benefit consumers.

Unfortunately, the Regional Bell Operating Companies have launched a full-scale attack on the UNE-Platform, realizing it is a major threat to their continued market dominance. Their strategy is to impose certain restrictions on individual network elements that would destroy the competitive value of the UNE-Platform. If the RBOCs succeed, it will all but end any chance for consumers to enjoy the benefits of meaningful competition in local phone service. In my opinion, the RBOCs achieved monopoly position as a result of many years of governmental promotion and protection and not through their own efforts. They should not be allowed to continue as monopolists, and destroy the small competitor, when the full benefits of competition are now beginning to flow to consumers and small businesses.

Please oppose any effort that will limit the availability of the UNE-Platform. The UNE-Platform should be firmly and permanently established as a viable service option for competitive telecom carriers.

Thank you very much for your time and attention to this important matter.

Sincerely,

Greg Ullstrom

Ullstrom@att.net

CC: Commissioner Adelstein, KM KJMWEB, Michael Copps, Kathleen Abernathy

Mr. Michael K. Powell, Chairman
Federal Communications Commission
Washington, DC
February 5, 2003

Dear Chairman Powell:

I am the CEO of a CLEC (Cat Communications International, Inc. dba CCI) which provides residential local exchange services (as well as long distance) to credit challenged low income consumers. CCI is one of the largest providers of residential local service to this segment of the economy throughout thirty (30) states.

In our on-going effort to provide ever better and cheaper local service to our customer base, UNE-p has come to be an essential element by which we can and do pass on additional saving to our customers. Without UNE-p we would be forced to increase charges or reduce the grade of service we can offer our local customers. Resale discounts typically do not reflect a true "avoided cost". Resale, on the contrary, is the most expensive way by which companies such as ours can make local phone service affordable to low income families. The history of residential service prior to the advent of UNE-p stands as clear evidence there will be no local residential competition at all without the assist provided by the availability of UNE-p. Only when access line densities or revenues reach certain levels of concentration can local residential service competition survive without UNE-p.

I urge you and the entire Commission to move with the greatest of care when addressing the importance of UNE-p for companies such as ours which has made affordable local residential phone service a reality for over 100,000 low income families.

I thank you for your kind attention on this very critical matter.

Sincerely,

Norman D. Mason, CEO
Cat Communications International, Inc. (dba CCI)
