[recipient address was inserted here]

[recipient name was inserted here],

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Leroy Q. McCoy

Subject: UNEs and UNE-P

Dear Honorable Commissioners,

I'm confident that most individuals you hear from who try to persuade you have some type of self-interest at stake. I am no different except possibly that in some cases, perhaps, self-interest has the proper motivation behind it. I hope and believe that my interest in what I state below is well-motivated.

My personal stake in the maintenance of the current UNEs (switching, transport, etc.) and the UNE - Platform is that I hold an investment in companies which would be adversely affected by any type of eradication of the existing framework. The reason I felt my investments were appropriate in the first place is because of my genuine belief that small businesses which have the opportunity to compete and grow are the backbone of a strong U.S. economy (has been the case for many years now). I realize the economy is hurting and big business is struggling but I don't believe the answer lies in activity aimed at restraining competition in the realm of local phone activity. By continuing the current environment, consumers are given better choices and small businesses have the opportunity to not only survive, but become real players.

Respectfully, the FTC is endowed with the responsibility of protecting citizens against monopolistic power via restraint of trade. In my opinion, if you alter the platforms which now exist which stimulate competition, the FCC is acting against the government's own acknowledgement of the need for the FTC. Please do not act hastily and take actions which protect the mammoth companies at the expense of the small players. Please do not help destroy the entrepreneurial spirit which ultimately will sustain our economy. Thank you for your careful consideration of my thoughts herein.

Subject: UNE-P

Please do not give in to the phone monopolies by lifting the requirement to lease portions of local phone monopolies to competitors which shall limit competition and increase rates.

Also, do not remove open access on broadband Internet access facilities which currently helps protect the success and future promise of the Internet.

These particular items are of importance not only to current generations of consumers but also to future ones. A former president, Theodore Roosevelt, spoke out correctly against monopolies and restriction of public access and time has proven him more farsighted than his generation in opening up transportation and communication to the wonders we take for granted in our time.
