Mr. Powell:

I am not a big political fan of Mr. Tauzin but the quote below is what needs to be done

Maybe AT&T should have been more like Microsoft when the government want to break them up.

I am not saying they should not have been broken up but if the Federal Government is going to brake up a company and establish rules/laws for the break up. They should not change the rules to help destroy AT&T unless

that was what the Federal Government wanted to do in the first place

I worked as salesman and technical support in the telecommunication industry for 38 years. (I retired from Western Union)

and I was there when MCI started up. I was there when Southern Pacific RR started Sprint.

There has been for several years competition in the long lines communication. The railroads played a major role.

Local service to homes is not easy with dealing with local/county/state government. Plus all the recurring cost.

Do you know what it costs to hang a wire on a pole

The same wire from the pole to my house was run over 36 years ago (I can not remember the wire ever replaced)

My local cost has gone up. My long distance has gone down.

Yes I did vote for Al Gore

I wish you and the other FCC commissioners the best of wise decision to be made.

I do not believe you could undo the 1996 telecommunication act if you wanted. No matter how harmful it was. All you

can do is make new laws. If your new laws favor the Bell Companies like I believe it will. I believe it will be harmful.

As far as high speed internet access goes as long as there is demand there will be service. Let it grow at its own pace.

I don't hear the people complaining

Homer Morrison

"Michael Powell's FCC needs to rip the rules put in place by Al Gore and Reed Hundt out by the roots and

throw them away," said Louisiana Republican Rep. Billy Tauzin at a hearing last week, seeking to blame the previous Democratic administration for the industry's current slump.

Joe Nash (joeynash@att.net) writes:

Please show some brains in this whole telecom mess you folks created. The thought that you all would let the SBC's of the world join with first PacBell and then Ameritech is amazing!!! I sell to telecom hardware SBC and even though you would think I would be selfish and want them to grow regardless of the cost to the consumer that is not the case. Stop this BS and do not think that cable or **some** other technology will provide in the short term the boost to the telecom sector. The bells are a monopoly which **is** hard to imagine in this day and age. And by the way thanks for letting the my AT&T stock dwindle down to nothing as you let the bells into **LD** without living up to there end of the **bargin** that they agreed and pushed for.

I received the following message: " The folks that control Internet Law in this country are the FEDERAL COMMUNICATIONS COMMISSION (FCC). These government bureaucrats have been persuaded by the huge phone companies of this country that laws should be suspended, competition should be abandoned, and free reign over your Internet service should be given to them, THE FCC, exclusively. Your world will change dramatically if these laws are abandoned and the phone companies are turned loose to pillage. The dangers are that: You will lose your independent ISP ; You will be able to purchase only the products and services the phone company wants you to have. You will purchase available services at whatever price they want you to pay. You will be largely ignored if you are not in a high density, high income area

New products will cease to arrive. What incentives will the Bells have to do research and development once the monopoly is restored? You will be assured of having LOUSY customer service, SOMEWHAT LIKE WHAT YOU NOW GET FROM THE PHONE COMPANY. (depressing!)"

Sir, I believe if you allow this to happen, you are not representing the majority of the people. I would have to give up my ability to be on line and research medical ways to help my family live day to day, help the children to learn (a vast majority of our teachers in our state are losing their jobs due to budget short falls).

If the above statement is true, please remember who you truly work for, the people or public at large.

Respectfully,

Cathleen Gummer

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies arent required to allow competitors access to the market. Im also concerned about the Commissions move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely

Lorne Hook
