Subject: Request Under 47 CFR 97.111 to place Iraq on "Ham" No Talk' List by commission.

ORIGINAL

Sirs:

A email was addressed to you in the last (2) days requesting that the commission take the stand not to allow ham to talk to IRAQ. At present there are no countrys on the "BAN" list.

Information I have received suggests that some "Hams" are "Breaking the Law" in the national intersts and giving INTEL to the national Intell agencies. International Communications is well defined under the CFR as to content of International allowed communications. [If some hams are breaing the law for the NSA, CIA, or Military Intel. then I'm asking for something that could hurt the nation.

I was told in one e-mail today that the IRAQ war could last close to 10 years, so the need's of the country come first.

I feel the if the outbreak of war starts you should "ban" on several countrys on a case by case need, 47 CFR 97.111 should be looked at to prevent any enbedded cell of hostal agents in the US from communicating with there home lands for support only.

A question on the application for a "FCC Ham [Amateur] License are you a citizen of the usa, and a listing of what countrys you have resided in the past +25 years when not a citizen, or of sorts. [In order to Red Flag] if need be!

Please place my request for the "Ban" countrys communications on hold, and check with the other agency's.

Thanks
