

Your new ruling for linesharing is totally not good for consumers. I hope you will change this ruling to allow people to continue to have good competitive services. This is not in the best interest of the consumer and hope you will reverse this silly rule of not allowing linesharing. People are out of jobs, the economy is not doing well and we need to have this stay in place. Please don't shut out our children from being able to use this technology.¹
Thanks
