

Dear FCC and to Whom it may concern,

I am a Global Crossing Shareholder that has recently read Global Axxess' proposal to become involved in the Global Crossing buyout. I would thus like to express my support for this proposal due to the honor and integrity that Karl Schwarz has shown in being cognizant that Global Crossing Management has committed fraud prior and during it's bankruptcy and that there are major National security issues with a foreign company having a majority control (or any control for that matter) of Global Crossing's important assets. Karl Schwarz is also aware of the economic ramifications a majority stake sale of Global Crossing to a foreign entity would have on the U.S. economy. The Global Axxess proposal also has current Global Crossing Shareholder inclusion to some degree, which helps to "right the terrible wrongs" that have been committed upon Shareholders during this disgusting big business fiasco. In doing this, Karl Schwarz and Global Axxess will help to restore some of the U.S. investor confidence that has been lost with all of the unethical and scandalous behavior that big business has shown. I trust that the FCC will make the patriotic and proper decisions as they pertain to this Global Crossing situation. Thank You for your time and effort, and God Bless America.

Sincerely Yours,

Peter J. Magoulas  
Global Crossing Shareholder
