

I am totally AGAINST PLC communication. I am an Amateur Radio Operator and I strongly agree with those who believe that PLC communications will adversely affect all HF communications! I am quite surprised that the Military has not expressed some of the same concerns since they occupy a good deal of the HF spectrum which is likely to be affected.

Please consider my comments in making your decisions. I know my feelings are shared by a large number of HAM radio operators and I would like to think our opinions are still worth something to the FCC.

Respectfully,

Tom Chambers KT4WW
