

I OBJECT to allowing increased concentration of ownership of media properties. I don't believe TV and newspapers should be owned by the same owners in any coverage area.

I am very concerned about limiting the breadth of viewpoints available in the mass media. I don't believe that the public interest is served by having mass media content controlled by a smaller number of people or organizations.

I don't believe the existence of the Internet fundamentally changes the mass media concentration threat. The Internet is NOT a convincing argument for allowing TV and newspaper ownership to be combined in any coverage area.
