In the matter of  
Global Crossing et.al. IB docket no 02-286

The request for an expedite ruling should be denied.

This is again a major change in the proposal. The third admendment present to this commission to date. The public will soon need a score card to keep up with the change of players and their interests.

Global Crossing{Gx} and Singapore Technologies Telemedia{STT} are attempting to proceed in haste. There is no "time of essence". This is a serious matter and different points of veiw should be allowed full time to comment.

The commission is being ask to approved a merge without cfius fbi and defense clearance. The fact of the matter is that CFIUS has ordered an extensive 45 day review. This review is a strong signal for denial.

The 60 plus percent ownership by a foreign government of STT is another reason for full and open discussion. The plan for the Singapore government to divest it's stake has been propose but not publish. Valid questions arise in ownership and in registration of this stock after divestiture ie street bearer personal name.

The country of record for "new Gx" to my knowledge has yet to be establish ie jurisdiction after sale will it still be in fcc hands for future merges if this company registers "off-shore"

There is multiple precedents that arise ie Vodophone/Deutsche Bank for one easily comes to mind.

sincerely

Edward M Killilea
