

In WWII, Germany began a campaign to "inform" its people via control of the media. Deregulation of the FCC will NOT give an advantage to an independent or non-Administration voice as is purported, but instead will allow the cream of the crop to rise to the top. The media giants will drown out any dissenting voice, and you know this.

So do we. This MUST be abandoned. For gods' sake, in the name of democracy, kill this motion. In the name of free speech, allow the people who own these airwaves to decide content.
