

FCC members and their Director,

You have an unequalled moment in history to affect the rights of the public to have an unfettered access to a broad with of intelligent and diverse input from media sources. As it stans currently more and more of us. Citizens of this great land are opting out of the mass media market and finhding our source of news in alternative markets. This surge will eventually awaken the behemoths who wish to own everything in a "ONE STOP SHOPPING" athmosphere to the fact that their markets are no longer viable avenues for marketing product and whether that product is political or commercial, this sea change as a result of over consolidation will revert the media ownership to more diverse interests.

This will take eons and you have it within your power to affect that change right now by confining ownership to allow the broadest possible ownership by diverse and important segments of the population, In otherwords all of us need input and access to the output. You owe this to the American Public for you are now writing His/Herstory for generations to come.

Please, use your vote and turn down director Powell's current direction with a strong unified vote to forge ahead in the democratic direction.

Thank You, respectfully, Willy Krebbers
