

FCC,

I am deeply concerned about the current one-sided censorship of information made available to the American public, and the degree to which that censorship will increase if the responsibility for providing a balance in information dissemination is put in the hands of a handful of mega corporations. At a time in world history when communication and honest reporting are SO critical, we need MORE diversity in news-gathering and news-broadcast not less. It may sound dramatic, but our standing in the world may depend on your decision. Please do not vote to deregulate the broadcast industry. Please.
