

I urge you to cancel the proposed media ownership rule change. This will only further deteriorate our already poor corporate media. More consolidation will continue the decline in quality of our news services. Due to this corporate conglomeration news is severely lacking in objectivity. This will only get worse if you agree to the rule changes. Your failings in regulating media can be seen in the loss of local radio, which uses the public airwaves, newspapers that make state-run papers look objective and independent, and televised news that is beyond horrid. Our only access to quality media is through foreign sites on the internet. It is a further insult that these changes are planned on being adopted without the public's involvement or the involvement of our representatives in congress. The people demand democracy and it seems as if your office is laughing in our faces. Do the right thing and give the people some respect.
