

I feel that the passage of this proposal will be extremely harmful to the HF radio spectrum, to the Amateur radio hobbieist, the short wave listener radio hobbieist, as well as a threat to the National Security of this country. The HF (high Frequency) band, as we know it, will become a useless piece of real estate due to the noise generated from the lines. With the current technology available in this country, an alternative method can certainly be arrived at that WILL NOT destroy the radio spectrum. A NO vote can be the ONLY reasonable result for this proposal.
