

Help shut down the noise from the CB'er on our block! He comes in loud and clear even with filter equipment. His set up has got to be illegal. The entire block has to suffer because of his CB interference day and night. We hear him on the phone, cuts out the signals on the tv, radio, makes dvd's jump and skip, internet connections are lost, just to name a few of the problems he is causing. The man's name is Ron and is in the 9300 block of Wildemere. His tower is taller than his 3 story house and someone said he is grounded to his fence which causes the interference. Please investigate and do something to help us.
