RE-10740

NOTICE - NOTICE - NOTICE - NOTICE - NOTICE - NOTICE - NOTICE

I was using a public terminal to submit stuff on the issue of FCC's RM-10740 the other day, I suspect the "Hacker Attack" because I did not get a confirmation of receipt for the ECFS. This was sent more than three times. I see all the postings have been received.

I also noticed more dup's posting of other trying to get through with same results more "Dups" in posting.

There was a thunder storm going through at the same time here in Ohio also with the computers "Flickered" and the "lights blinked" whatever the excuse, please only count my posting as "One" for the RM-10740 issue, side comments, and facts or emails sent to me may have a status of a update ideas.

I do however think that there should be a very limited and re-defined ruling in regard to this as the commission has had several changes in emission of "PHONE" in the past, without a clear cut matter of "Fact" bandwidth!

Protections for older equipment must be addressed in this issue as an additional matter. Older Equipment & Collector Equipment must be protected for historical reasons. [Hysterical Also!] If you seen some of the good and bad stuff on hamfest tables.

Again sorry for "Dups" blame it on me, the storm, or the web hacker attack. It's like a pain today, a problem tomorrow, sorry.

Dale E. Reich keep them Ideas coming
141 North Center St.
Seville, Ohio 44273

Telephone (330) 769-3071 + lots of Rings for Answer machine
it's a long walk to the phone also, No "000" / "PPP" or "Blocked
Caller ID"!
