

the apartment complex has failed to provide us with phone service in over a week. Those tenants that have complied are told that it is in the corporates hands. After being told that I would have phone service Tues (July 8) and then again by noon at the latest on Thur (10th) I still am without phone on this Friday. This company has failed to post any type of update or info on our phones. We can not call out and no one can call in. Very dangerous in case of an emergency.
